

## Fiber optic splice tray T-TACKA-14

**Fiber optic splice tray T-TACKA-14** it's serial product made in durable injection-molded **ABS** process in grey color. Splice tray consist of two pieces: tray and hinged cover.

The tray is adapted to store fiber-optic splices protected by heat-shrinkable sheaths. This product can be used in the construction of telecommunications networks based on single- and multi-mode fiber optic cables. The tray has been designed to organize fiber optic fibers, and offers the option of placing up to **12 welds**. The product has been designed in a way that allows the same trays to be stacked through hinges to facilitate subsequent maintenance and management at distribution points.

The product is intended for installation in joints, distribution boxes, and fiber optic boxes. The assembly will allow three holes with a diameter of **4 mm** each, placed on the back of the tray.

### Application?

- Telecommunications subscriber loop
- Fiber to the home (FTTH)
- LAN/WAN
- CATV

### SPECIFICATION

<b>Model</b>	T-TACKA-14
<b>Material</b>	ABS
<b>Size W*H*D(mm)</b>	175*106*13
<b>Capacity</b>	12 welds
<b>Assembly</b>	Can be mounted inside the outdoor fiber optic distribution box .

### Feature:

1. Management and storage pigtail
2. Fiber optic fusion protection
3. Use for single-mode or multimode fiber
4. Durable injection-molded plastic trays and covers
5. Three holes for mounting of the tray
6. Could place 12-fiber in the slots
7. Installable in outdoor /indoor distribution box, wall Mount enclosures & splice closures
